Zellij

everything starts with `ctrl y` → **pane mode**; `esc` gets back out

NORMAL MODE

`ctrl` `y`	→ pane mode (turns pane frames on)
`ctrl` `J`	previous tab
`ctrl` `K`	next tab

PANE MODE — PANES

`h` `j` `k` `l`	move focus
`H` `J` `K` `L`	new pane left / down / up / right
`ctrl` `d`	close focused pane
`f`	fullscreen toggle
`w`	toggle floating panes
`e`	embed ↔ float the focused pane
`c`	rename pane
`z`	toggle pane frames
`/`	open scrollback in nvim
`m`	→ move mode (swap panes around)
`r`	→ resize mode
`s`	→ scroll / search mode

PANE MODE — TABS & SESSION

`t`	→ tab mode
`ctrl` `t`	rename tab
`n`	new tab
`ctrl` `h`	previous tab
`ctrl` `l`	next tab
`ctrl` `1` … `9`	go to tab n
`ctrl` `D`	close tab
`ctrl` `s`	toggle sync for this tab
`o`	→ session mode
`d`	detach
`ctrl` `q`	quit zellij

TAB MODE

`h` `l`	previous / next tab
`H` `L`	**move the current tab** left / right
`1` … `9`	go to tab n
`tab`	toggle — jump back to the tab you came from
`n`	new tab
`x`	close tab
`r`	rename tab
`s`	toggle sync: type once, every pane in the tab gets it
`esc`	back to normal

MY POPUPS (PANE MODE)

`ctrl` `y`	`ctrl y` twice: floating `task switch` picker
`a`	floating prompt: new task
`g`	show the kanata symbol layer

RESIZE / MOVE / SCROLL

`r` `h` `j` `k` `l`	grow the pane in that direction
`r` `+` `-`	grow / shrink all round
`m` `h` `j` `k` `l`	move the pane in that direction
`m` `tab`	swap with the next pane
`s` `j` `k`	scroll line, `d` `u` half page
`s` `/`	search; `n` `N` next / previous match
`s` `e`	edit scrollback in nvim
`esc`	every sub-mode returns to pane mode

TWO TAB TRICKS WORTH REMEMBERING

Sync (`s` in tab mode, `ctrl s` in pane mode) broadcasts your keystrokes to **every pane in the tab** — one `git pull`, four repos. The tab bar shows `<SYNC>`; press again to stop.

Toggle (`tab` in tab mode) is “previous tab” in the alt-tab sense: it flips between the last two tabs you used, not between neighbours. Ideal for bouncing editor ↔ logs.
